

Software Engineering and Data Science
SEIS 766: Vision AI
Assignment #1

Due Date: February 12th

1. Research on internet to find **ONE** interesting vision AI tool for doing image generation, image translation, image reconstruction. You can also choose a tool we mentioned in the “*Introduction*” slide.
2. Depend on the tool’s requirement, input one or few images into the tool.
3. Get output image / images from the tool.
4. Put the input images and the output images (or their screenshots) into a WORD document. If the tool requires other inputs like text, also include additional inputs in the same WORD document.
5. Include the name and the link of the tool you used in the same WORD document.
6. Include the time the tool took in generating the results in the same WORD document.

Submission Guideline:

1. Please type your answers in a WORD document. **Don’t forget to include** your name on the top of your WORD document.
2. Please upload your WORD document on **Canvas** no later than the due date.
